

PROFESSIONAL SUMMARY

Software Engineer with over two years of experience designing, developing, and deploying scalable applications. Experienced in Python, Django, React, TypeScript, Docker, AWS, GCP, and Linux. Skilled in backend development, cloud deployment, RESTful APIs, and DevOps practices. Passionate about building reliable, scalable software solutions and seeking opportunities in software engineering, system development, and DevOps.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, SQL
- **Frameworks:** React, Angular, Django, Node.js, RESTful APIs, HTML5, CSS3
- **Cloud & DevOps:** Docker, AWS, GCP, Nginx, CI/CD
- **Databases:** MySQL, Redis, PostgreSQL, MongoDB
- **Version Control:** Git, GitHub
- **Operating System:** Linux

PROFESSIONAL EXPERIENCE

- Software Engineer (Freelance)

November 2022 – August 2026

 - Developed responsive Single-Page Applications (SPAs) using React, Vite, and Tailwind CSS, delivering fast, intuitive, and user-friendly web experiences.
 - Designed and developed scalable RESTful APIs and backend services using Django, Fastify (Node.js), MongoDB, and MySQL to support authentication, dynamic data processing, and real-time interactions.
 - Developed a Python-based educational application to help students learn and practise Armstrong numbers using efficient algorithms and responsive interfaces.
 - Collaborated with cross-functional teams of 3–5 developers, using Git, GitHub, code reviews, and Agile methodologies to deliver features within project deadlines.
 - Deployed and managed a client application on AWS, configuring Linux-based cloud environments for secure and reliable application hosting.
 - Configured Nginx as a reverse proxy to manage application routing and improve the performance and reliability of deployed web applications.
- Software Engineer | Leapsoft Ltd

September 2024 – September 2025

 - Led end-to-end application deployments across development, staging, and production environments, coordinating release activities to ensure reliable software delivery.
 - Maintained and updated web and mobile applications, enhancing features and fixing bugs to improve stability and performance.
 - Configured and maintained Linux-based server environments to support secure and reliable application deployments.
 - Provided hands-on technical support for application and system issues, reducing troubleshooting turnaround time by 30%.
 - Collaborated with developers, end-users, and stakeholders to resolve technical issues and improve system reliability.
 - Implemented real-time functionality using WebSockets and AJAX, enabling seamless data updates without full-page reloads.
 - Containerised frontend and backend applications using Docker for staging deployments, ensuring consistent environments across development and testing.
 - Provisioned and configured a staging environment on Google Cloud Platform (GCP) to support pre-production testing and deployment validation.
 - Implemented CI/CD pipelines, API versioning, and secure deployment workflows to streamline software delivery and improve deployment reliability.

PROJECTS

- Property Rental Management System | [LINK](#)

 - Built a full-featured property rental application enabling landlords to list properties and tenants to book stays.
 - Designed a scalable backend API to handle listings, user roles, reviews, and communication.
 - Implemented secure user authentication and real-time booking management.
 - Integrated push notifications and role-based dashboards for tenants, landlords, and admins.
- E-commerce REST API | [LINK](#)

 - Built a production-ready e-commerce backend supporting product catalog, cart, orders, and payment workflows.
 - Developed scalable RESTful APIs with Django REST Framework, including search, filters, and pagination.
 - Implemented secure JWT authentication with role-based access for customers, staff, and admins.
 - Integrated payments and automated order confirmation emails using Celery + Redis.

EDUCATION

Aptech Computer Education
Advanced Diploma in Software Engineering

Lagos, Nigeria
November 2022 - November 2024

Middlesex University London
BSc (Hons) Information Technology & Business Information Systems

London, UK
Expected Graduation 2027
