PROFILE SUMMARY

Creative Software Engineer, passionate about building and optimizing the performance of user-centric, high-impact software's for nationwide and global companies. Leverage technical, analytical, and problem-solving skills to create dynamic, high-speed software's, fueling competitive advantage and revenue growth. Excels in every stage of the life cycle of software development, including design creation, development, debugging, testing, deployment and maintenance. High-performance individual skilled at defining, designing, and implementing a highly secure, continuous-deployment pipeline to update applications in cloud environments.

CORE COMPETENCIES

- | | | |
|------------------------------|--|--|
| • Software Development | • Object-Oriented Design and Development | • Continuous Integration & Continuous Deployment |
| • Agile Methodologies | • Problem Solving | • Cloud Platforms |
| • Information Architecture | • Version Control Systems | • DevOps Practices |
| • Microservices Architecture | • API Integration & Web Services | • Automated Testing |
| • Project Management | • Information Architecture & User Experience | • Performance Optimization & Scalability |
| • Search Engine Optimization | | |
| • Test Driven Development | | |

SKILLS HIGHLIGHTS

- Comprehensive portfolio: Proven experience in developing high-quality software solutions across various platforms, ensuring compliance with industry standards. Knowledge of multiple front-end languages and libraries (e.g. HTML, CSS, JavaScript, TypeScript).
- Front-End Technologies: Proficient in HTML, CSS, JavaScript, TypeScript, and modern front-end frameworks. Ability to develop unit testing of code components or complete applications.
- Mobile & Software Development: Expertise in building cross-platform and native applications, with a focus on delivering seamless user experiences.
- Back-End Expertise: Strong knowledge of back-end languages and databases, including Python, Django, MySQL, and MongoDB.
- Unit Testing & Automation: Expertise in developing unit tests for code components and entire applications, ensuring high code quality and reliability.
- Clean, Efficient Code: Skilled in writing well-designed, testable, and efficient code using current best practices in software development.
- Version Control: Proficient with Git and version control tools (GitHub, GitLab) for collaboration and source code management.
- Performance Optimization: Ability to optimize software performance, focusing on speed, responsiveness, and scalability.
- Security Best Practices: Knowledge of secure coding practices, data encryption, and vulnerability assessments.
- Collaboration & Agile: Experienced in working in Agile/Scrum environments, collaborating with cross-functional teams to deliver high-quality software products on time.

WORK EXPERIENCE

Front-End and Back-End Developer (Freelancing)

2022 - Present

- Collaborated with a team of 5 to develop a single-page website focused on gardening. Designed and implemented the front-end, ensuring a seamless and user-friendly experience for users seeking gardening tips and techniques.
- Worked within a team of 5 to create a Python-based web application aimed at helping students understand and practice Armstrong numbers. Built and optimized the logic for calculating Armstrong numbers, ensuring efficient and accurate performance across all user queries.
- Developed responsive and user-friendly web interfaces using HTML, CSS, JavaScript, and modern front-end frameworks such as React and Angular.
- Design and develop robust and scalable back-end services using languages such as Python.
- Ensure cross-browser compatibility and optimize applications for maximum speed and scalability.

- Designed and maintained scalable backend systems using Node.js and Fastify for various production-level applications
- Built and deployed dynamic frontend interfaces using React, ensuring cross-browser compatibility and responsive design.
- Implemented RESTful APIs and handled API versioning for backward compatibility.
- Collaborated with SRE teams on monitoring, incident response, and alerting.
- Contributed to the development and maintenance of CI/CD pipelines.
- Participated in code reviews, maintenance of high code quality

IT Support Specialist and Software Developer

September 2024 – Present

- Provide first-level technical support for hardware, software, and network-related issues.
- Respond to and resolve IT support tickets in a timely manner.
- Assist in the installation, configuration, and maintenance of computer systems and applications.
- Support end-users in troubleshooting system errors and connectivity problems.
- Maintain IT security protocols, including password policies and access controls.
- Assist in software updates, system backups, and data recovery processes.
- Provide basic IT training and guidance to employees as needed.
- Enhanced and extended functionality of existing web and mobile applications by developing and integrating new features.
- Diagnosed and resolved software bugs, improving app stability and performance.
- Managed deployment processes for updates and new features across web servers and mobile platforms.

PROJECT

Task Management App

[Link](#)

Technologies: Python, Django, JavaScript, MySQL

- Developed a task management application to help users track their daily tasks.
- Integrated AJAX for real-time updates and dynamic content rendering.
- Implemented CRUD operations and user authentication with Django.

StayEase Property Rental Management System

[Link](#)

Technologies: React, Vite, Tailwind CSS, Node.js, MongoDB

- Built a full-featured property rental application enabling landlords to list properties and tenants to book stays.
- Designed a scalable backend API to handle listings, user roles, reviews, and communication.
- Implemented secure user authentication and real-time booking management.
- Integrated push notifications and role-based dashboards for tenants, landlords, and admins.

EDUCATION

- **Advanced Diploma in Software Engineering (ADSE)** – APTECH
